BigYieldCoat Soy is a nutrient supplement that gives soybean seedlings what they need to get a head start on the growing season. It's survival of the fittest, so give your plants the supplements they need to emerge, grow and thrive. Crops will get up and out of the ground faster; grow stronger stems; and better compete for nutrients, water and sunlight. Tests have demonstrated yield increases of up to 7.5%. This product is approved by the Washington State Department of Agriculture for organic use.
